## **Still time to respond to the 2022 Census of Agriculture** USDA to follow up with Alaska producers who have not yet responded

Olympia, WA – February 24, 2023 – Farmers and ranchers in Alaska still have time to be counted in the 2022 Census of Agriculture, according to the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS). Although the deadline for submitting the ag census has just passed, NASS will continue to accept completed census questionnaires through the spring to ensure all farmers and ranchers take advantage of the opportunity to be represented in the widely used data.

"I want to take the opportunity to express my appreciation to those that have already completed their Census of Agriculture. It is vitally important that all Alaska ag producers take part in representing their industry" says Dennis Koong, Director, Northwest Regional Field Office. "Even though the February 6<sup>th</sup> date has passed, it is not too late for your voice to be counted! The data provided will be a valuable piece of history and will inform decisions that will help shape the future of American agriculture."

NASS will continue to follow up with Alaska producers through the spring with mailings, phone calls, and personal visits. Farmers and ranchers are encouraged to complete their ag census either online at [agcounts.usda.gov](https://agcounts.usda.gov) or by mail as soon as possible.

Federal law under Title 7 USC 2204(g) Public Law 105-113 mandates that everyone who received the 2022 Census of Agriculture questionnaire complete and return it, even if they are not currently farming. The same law requires NASS to keep all submissions confidential, use the information for statistical purposes only, and publish aggregate data to prevent disclosing the identity of any individual producer or farm operation.

NASS will release the results of the ag census in early 2024. To learn more about the Census of Agriculture, visit [nass.usda.gov/AgCensus](https://nass.usda.gov/AgCensus). On the website, producers and other data users can access frequently asked questions, past ag census data, special study information, and more. For highlights of these and the latest information, follow USDA NASS on Twitter at [@usda\\_nass](https://twitter.com/usda_nass).

*NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.*
