**Comments from Cooperative Extension Service County Agents**

“Dicamba injury continued to show on crops as well as other non-crop plants.”

-Branon Thiesse, Craighead County

“Soybean planting was rapidly being completed. Early rice approached boot stage and corn entered milk stage. Dicamba damage to soybeans confirmed. Rice blast was detected in Jupiter and Titan varieties.”

-Brent Griffin, Prairie County

“Rains from Tropical Storm Cindy provided much needed moisture for pastures and hay fields. This may help with hay production and summer pastures for cattle producers. Hot, dry weather is forecasted, so producers welcomed the rain. Timber, gardens, and orchards are in good shape.”

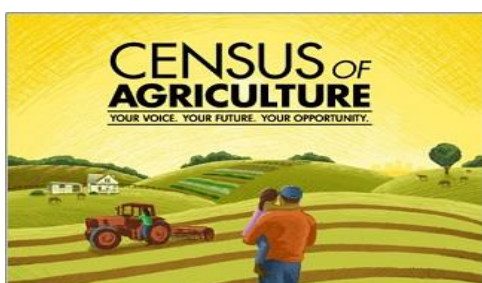

-Glenda Sutherlin, Union County

“Producers continued planting soybeans last week. Rice neared midseason and nitrogen applications should go out soon. Rice blast was found on a field of LaKast variety and is being scouted closely.”

-Kevin Lawson, Perry County

“Corn was being irrigated early in the week. Some soybean producers were watering, while others waited to see what rain would come with Tropical Storm Cindy.”

-Dave Freeze, Greene County
