

Arkansas Crop Progress and Condition

Delta Region - Arkansas Field Office

10800 Financial Centre Parkway, Suite 110 Little Rock, Arkansas 72211
(501) 228-9926 · FAX (855) 270-2705 · www.nass.usda.gov

Cooperating with the University of Arkansas – Division of Agriculture

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at <https://www.nass.usda.gov/ar> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the county extension agents who responded to this survey.

Week Ending: April 17, 2022

Released: April 18, 2022

According to the National Agricultural Statistics Service in Arkansas, there were 2.5 days suitable for fieldwork for the **week ending Sunday, April 17, 2022**. Topsoil moisture supplies were 0 percent very short, 3 percent short, 56 percent adequate, and 41 percent surplus. Subsoil moisture supplies were 1 percent very short, 4 percent short, 43 percent adequate, and 52 percent surplus.

Crop Progress for Week Ending April 17, 2022

Crop	This week (percent)	Last week (percent)	Last year (percent)	5-year average (percent)

Arkansas Subsoil Moisture Map for the Week of April 4 – April 10, 2022

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.
