Cooperating with the Arkansas Department of Agriculture

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at <https://www.nass.usda.gov/ar> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the county extension agents who responded to this survey.

Week Ending: March 31, 2024

Released: April 1, 2024

According to the National Agricultural Statistics Service in Arkansas, there were 4.4 days suitable for fieldwork for the **week ending Sunday, March 31, 2024**. Topsoil moisture supplies were 0 percent very short, 5 percent short, 57 percent adequate, and 38 percent surplus. Subsoil moisture supplies were 0 percent very short, 5 percent short, 57 percent adequate, and 38 percent surplus.

Crop Progress for Week Ending March 31, 2024

Crop	This week (percent)	Last week (percent)	Last year (percent)	5-year average (percent)

Arkansas Subsoil Moisture Map for the week of March 18 – March 24, 2024

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.
