Kansas Wheat Varieties

3705 Miller Parkway, Ste. A, Manhattan, KS 66503 • (800) 582-6443 Media Contact: Doug Bounds (800) 582-6443

Released: March 2017

Everest on Top for Fifth Consecutive Year

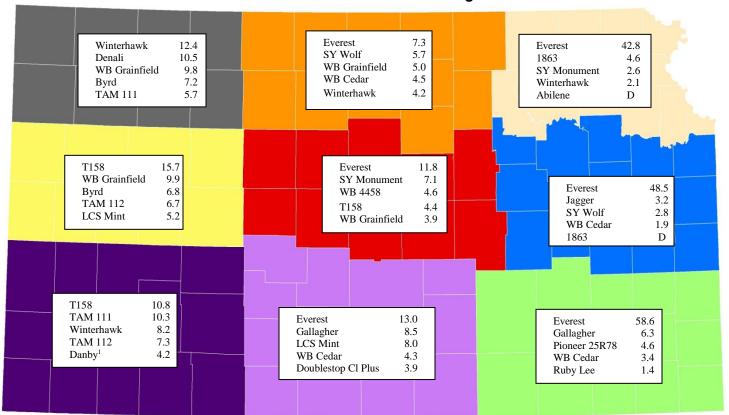

Although its share of all Kansas wheat fell for the second consecutive year, Everest retained its position as the leading variety of wheat seeded in Kansas for the fifth straight year, accounting for 9.6 percent of the State's 2017 wheat crop. It is the first year since at least 2003 that no single variety has accounted for ten percent or more of the Statewide acreage. Everest, developed by Kansas State University, was the most popular variety in the eastern two thirds of Kansas. T158 likewise retained its position as the second most popular variety in Kansas. Winterhawk moved into third place from fourth with 4.8 percent. LCS Mint continued its upward trajectory since 2015, coming in fourth with 4.3 percent. WB Grainfield, a newcomer to the top ten, tripled its 2016 share to place fifth with 3.9 percent. TAM 111 fell three spots to sixth with 3.9 percent. Gallagher maintained its seventh spot, while TAM 112 dropped two spots to eighth. SY Monument and Denali rounded up the top ten, the former experiencing more than a quintuple gain in its share from last year.

Area planted with blended varieties was not included in the rankings by variety. Blends accounted for 14.3 percent of the State's planted acreage and were used more extensively in the north central, east central and central areas of the State. Hard white varieties accounted for 2.9 percent of the State's acreage, down from 3.2 percent in 2016. Danby was the leading hard white variety, accounting for over 30 percent of the State's white wheat. The majority of the white wheat was planted in the southwestern portion of the State.

There were 2,617 positive reports summarized for this year's Wheat Varieties survey.

This Wheat Variety project is funded by the Kansas Wheat Commission.
