

WHEAT VARIETY

Released: February 5, 2007

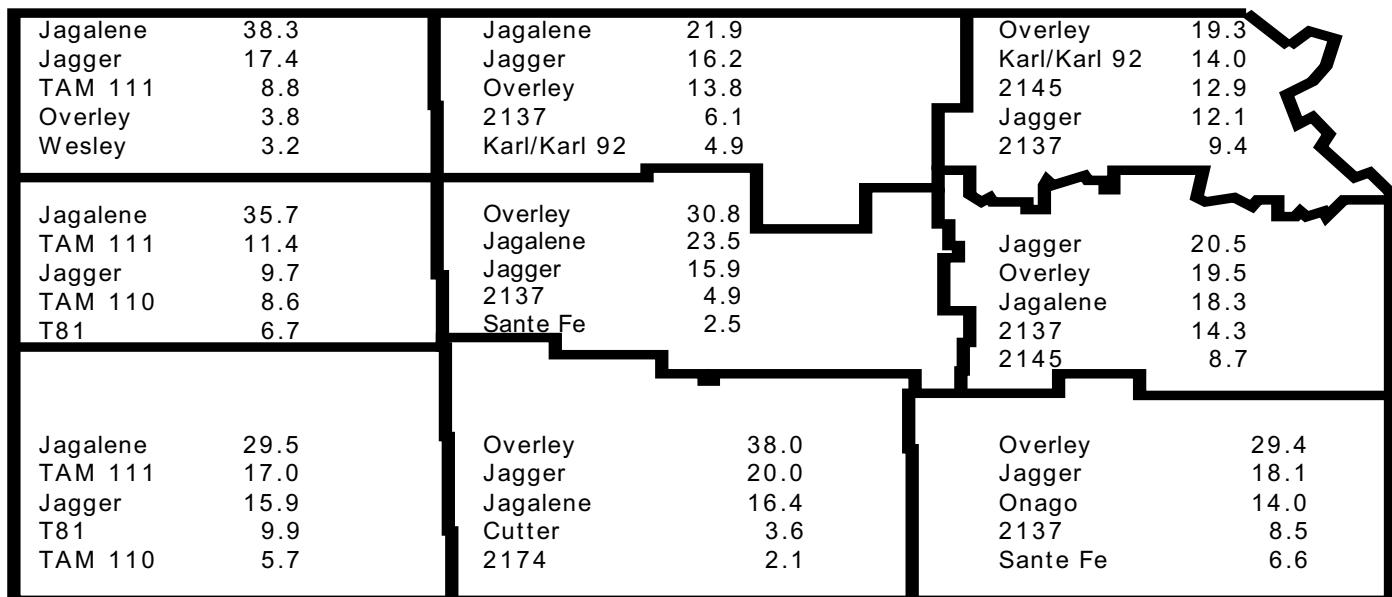

Overley Captures Number One

Overley became the leading variety of wheat seeded in Kansas for the 2007 crop. Jagalene held this position last year. Accounting for 23.3 percent of the State's wheat, Overley increased 8 points from a year ago and was the most popular variety in four of the nine districts. Jagalene moved down to second place, with 23.1 percent of the acreage. Jagalene decreased 4.1 points but was the most popular variety in four of the nine districts. Jagger came in third at 17.1 percent, down 2.6 points. TAM 111 moved up to fourth place, with 4.0 percent of the acreage. The KSU maintained variety 2137 moved down to fifth place with 2.9 percent of the acreage. Cutter moved up to sixth place with 2.1 percent of the acreage. T81 dropped to seventh place at 2.0 percent while TAM 110 moved down to eighth place at 1.5 percent.

Sante Fe moved up to ninth place with 1.3 percent of the State's acreage. Ike rounded out the top ten at 1.2 percent. Acres planted with blended varieties were not included in the rankings by variety. Blends accounted for 10.4 percent of the State's planted acres and were used more extensively in the north central, northeast, and central areas of the State. Out of the total acres planted with blends, 62.1 percent included Jagger in the blend, 51.0 percent had Jagalene in the blend, and 39.6 included Overley. Hard White varieties accounted for 1.7 percent of the State's acreage. Danby was the leading Hard White variety, accounting for 41 percent of the State's white wheat. The majority of the white wheat was planted in the western third of the State. This Wheat Variety project is funded by the Kansas Wheat Commission.
