Volume 12 No. 1

TAM 111 Holds onto Number One Wheat Variety for Kansas

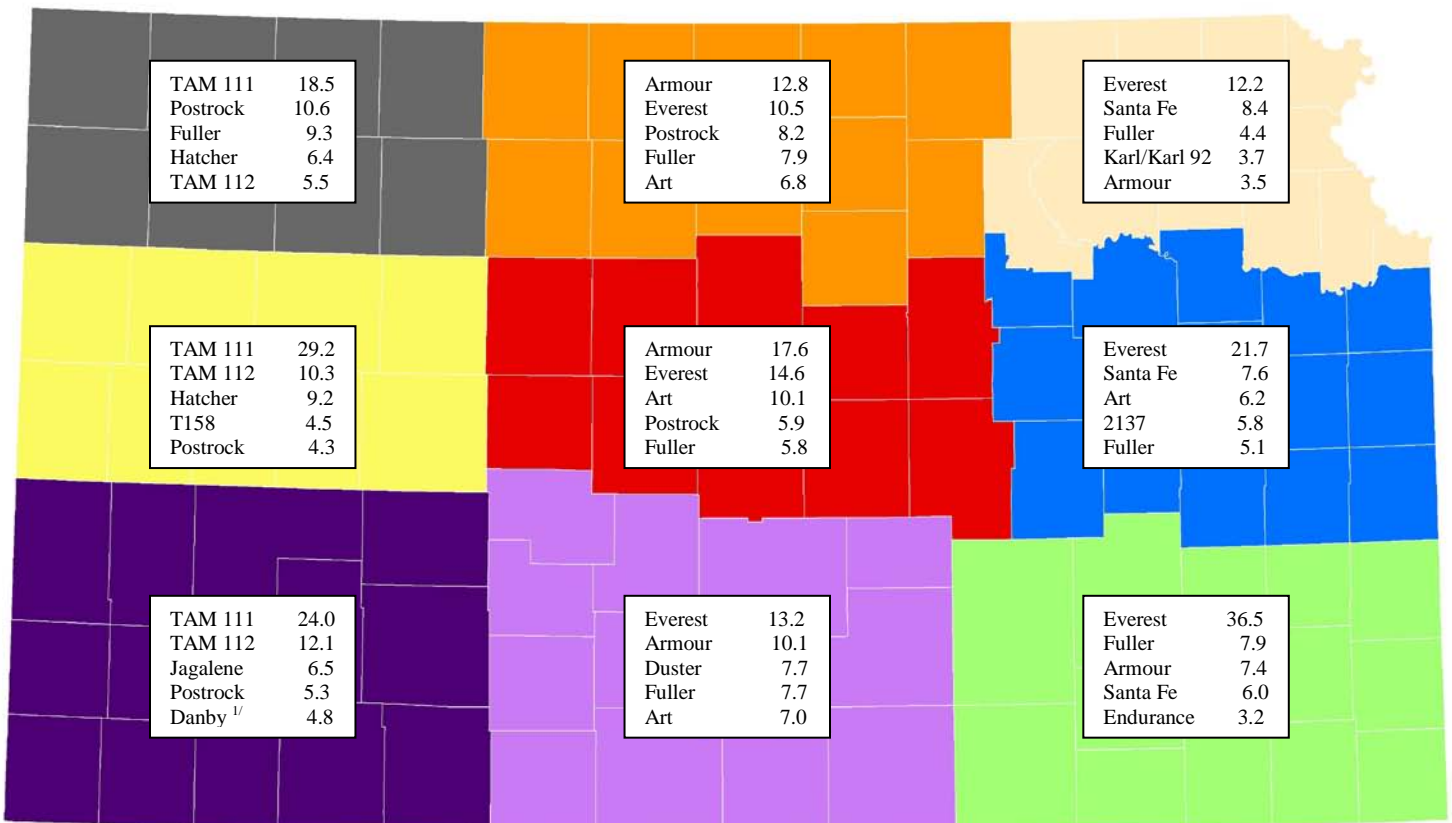

TAM 111 is again the leading variety of wheat seeded in Kansas, accounting for 12.6 percent of the State's 2012 wheat crop. TAM 111 was the most popular variety in the western third of the State. Everest jumped up 14 spots to second in the State with 8.0 percent of the acreage and is the leading variety in all three of the Eastern Districts. Armour moved up to third place with 7.5 percent of the State's acreage. Fuller slipped down two places to fourth place, with 5.5 percent of the acreage, while TAM 112 came in fifth at 5.2 percent, up 1.4 percent from last year. Postrock fell to sixth place at 4.9 percent, followed by Art in seventh place with 4.3 percent of the acreage. Duster came in at eighth place with 2.6 percent, while Jagger dropped to ninth place at 2.5 percent. Hatcher, moving up two places, rounded out the top ten at 2.4 percent for 2012.

Area planted with blended varieties was not included in the rankings by variety. Blends accounted for 9.0 percent of the State's planted acreage and were used more extensively in the north central, east central, and central areas of the State. Hard White varieties accounted for 2.2 percent of the State's acreage, unchanged from 2.2 percent in 2011. Danby was the leading Hard White variety, accounting for just over 50 percent of the State's white wheat. The majority of the white wheat was planted in the southwestern portion of the State.

There were 4,215 positive reports summarized for this year's Wheat Varieties survey.

This Wheat Variety project is funded by the Kansas Wheat Commission.
