USDA to Survey Farmers' Planting Intentions for 2022

Columbia, Missouri – February 2022 – As the 2022 crop production season begins, the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) will contact producers nationwide to determine their plans for the upcoming growing season.

"Each year, the agriculture industry anticipates USDA's Prospective Plantings report, which provides the first survey-based estimates of U.S. farmers' planting intentions for the year," said NASS' Missouri State Statistician Bob Garino. "The March Agricultural Survey provides the factual data that underpins these projections, making it one of the most important surveys we conduct each year."

NASS will mail the survey to 3,300 producers in February, asking producers to provide information about the types of crops they intend to plant in 2022, how many acres they intend to plant, and the amounts of grain and oilseeds they store on their farms. Producers can respond online at agcounts.usda.gov or by mail. Those who do not respond by February 26 may be contacted for an interview.

In accordance with federal law, NASS keeps responses confidential and publishes data in aggregate form only, ensuring that no individual operation or producer can be identified.

Survey results will be published in the Prospective Plantings and quarterly Grain Stocks reports on March 31, 2022. These and all NASS reports are available online at www.nass.usda.gov/Publications. For more information, contact the NASS Heartland Regional Field Office at (800) 551-1014 or nassrfohlr@usda.gov.
