USDA TO FORECAST CROP YIELDS

[Columbia, Missouri] –Beginning in late September, the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will survey farmers across the U.S. asking for the yield of harvested crops or expected yield for their crops not yet harvested. NASS will publish estimates based on these surveys for each crop in each state, along with national estimates. This is the third in a series of four monthly surveys.

“USDA-NASS monthly crop forecasts are used by famers, policy makers, researchers and businesses that use grains,” said Robert Garino, Missouri State

	Record	Year	Current	Rank
Production (Million Bu)				
<i>Corn</i>	629	2014	476.8	6
<i>Soybean</i>	296.3	2022	284.4	3
Yield (Bu/Acre)				
<i>Corn</i>	186	2014	149	9
<i>Soybean</i>	51	2020	47	5

Statistician. “NASS relies on Missouri farmers to provide the data needed to make those forecasts.” NASS encourages farmers to respond online, at agcounts.usda.gov, or by mail. Prompt response helps reduce costs. “Providing timely and accurate agricultural information helps both grain producers and users,” added Garino.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified, as required by federal law. Results will be published in the Crop Production Report, released October 12th, available online at www.nass.usda.gov/Publications.

For more information contact the NASS Heartland Regional Field Office at 800-551-1014 or nassrfohlr@usda.gov
