

MONTANA

2011 Agricultural Statistics

2009-2010 County Estimates

Montana Agricultural Statistics Districts

About the Cover

The cover photograph is an alfalfa field located near Cascade, MT. This field and over one-third of the State's alfalfa acreage is irrigated. Alfalfa is the most important forage crop in Montana. It is grown in every county in the state with a majority of production being consumed by the state's livestock industry.

**COMMENTS FROM
OUR GOVERNOR**

Agriculture continues to be a driving economic force and a major reason Montana's economy has remained stronger than all but a handful of states. The three major commodities, wheat, cattle and hay, were valued at more than \$3 billion in 2010, the year reflected in this annual publication. Although this year's wet spring and other factors may reduce production, stronger prices point to yet another record year in 2011.

High yields in most wheat categories pushed the value of Montana's 2010 production to \$1.4 billion, a record for the crop and a 56 percent increase from the previous year. Gross income for cattle and calves also was a record at \$1.1 billion, up 18 percent. Not all of those amounts is profit, of course. Energy prices and feed costs have tightened the margins for crop and livestock producers.

High fertilizer costs and strong demand for nitrogen-fixing legume crops are among reasons Montana has become a major producer of lentils, dry edible peas and chickpeas. The 2010 gross value of lentil production was up 78 percent to \$77.6 million, while the value of dry peas was up 29 percent.

Our producers continue to innovate to add value to their products, expanding Montana's agriculture. If you have ideas about business opportunities for Montana, use the comment form on our website, www.governor.mt.gov or give my office a call at 444-3111.

Sincerely,

Brian Schweitzer, Governor

**MESSAGE FROM
THE DIRECTOR**

2010 was another record year for gross agricultural receipts, with a strong possibility that high prices will also push the 2011 total significantly above the \$3 billion mark. Last year, favorable weather compensated for so-so prices. In 2011, favorable prices offset production setbacks affected by late planting or flooded fields.

Looking forward, producers need to make the case with Congress that a strong farm safety net is needed for years when the combination of prices and yields produce less than stellar results. This will be a challenge in the current budget climate, but is aided by the fact that current projections show increasing demand for food crops, meaning that the cost of a safety net will be lower if it emphasizes programs that provide dollars only in years when income drops significantly.

This annual Montana Agricultural Statistics bulletin is a cooperative effort between the state and the National Agricultural Statistics Service, providing county-by-county data on the previous year's production of crops and livestock. During the year, updates are available electronically at www.nass.usda.gov/mt.

Sincerely,

A handwritten signature in black ink that reads "Ron de Yong".

Ron de Yong, Director, Montana Department of Agriculture

**NOTES FROM
THE DIRECTOR**

Since October 1, 1945, a Memorandum of Understanding has existed between The United States and Montana Departments of Agriculture. The original agreement stated the object was to consolidate and coordinate the activities of the two departments for the collection, compilation, analysis, and publication of primary statistical data, for the State of Montana, relating to the production, price, value, movement, stocks, marketing, processing and other utilization of crops, livestock and other agricultural products, and thereby to avoid duplication of effort, eliminate confusion of conflicting reports and promote economy and efficiency of operations, through close cooperation in these activities.

This agreement has been amended through the past 66 years, but the basic premise of Federal and State employees working side-by-side to serve Montana's Agricultural Producers remains unchanged. The National Agricultural Statistics Service provides timely, accurate and useful statistics in service to U.S. agriculture. This would not be possible without the voluntary reporting of farmers, ranchers, and agribusinesses across the State. Thank you to individual survey respondents and organizations, such as the Montana Wheat and Barley Committee who supply funding for several of the data series contained in this publication. Thank you to the employees of the Montana Field Office and The National Association of State Departments of Agriculture who interview producers to compile this wealth of useful information. Finally, thank you to the Montana Department of Agriculture who has partnered with NASS and her predecessors for all this time.

A handwritten signature in black ink that reads "Steve Anderson".

Steve Anderson, Director, USDA, NASS, Montana Field Office

Department Mission

"To protect producers and consumers and to enhance and develop agriculture and allied industries."

Director Ron de Yong, (406) 444-3144

Central Services Administrator: Libbi H. Lovshin

Attorney: Cort Jensen

Public Information Officer: Ron Zellar

Department Programs & Background

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums and works to make the department's programs accessible to the public.

Agricultural Development Division

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

<p>Ag Marketing & Business Development Bureau</p> <ul style="list-style-type: none"> ▪ Marketing and Business Assistance ▪ Grants and Loans ▪ Agriculture Curriculum Development 	<p>Rural Development Bureau</p> <ul style="list-style-type: none"> ▪ Agricultural Finance ▪ Agricultural Statistics ▪ Commodity Check-off Programs ▪ State Hail Insurance
<p>Wheat & Barley Bureau, Great Falls</p> <ul style="list-style-type: none"> ▪ Producer funded research and marketing ▪ Hosts foreign buyers and delegations 	<p>State Grain Laboratory, Great Falls</p> <ul style="list-style-type: none"> ▪ Federally licensed grain inspection

Food and Agriculture Development Centers assisted 100 clients with regional food and farm-derived energy projects in FY 2010, helping to create or retain 150 employment positions.

Growth Through Agriculture grants and loans during FY 2010 totaled more than \$1.1 million to 42 businesses and individuals for value-added agriculture projects.

Marketing assistance during FY 2011 included more than 80 one-on-one company consultations; about \$1 million in trade show sales; and 27 promotions in out of state trade shows.

Rural Development finance programs have a combined loan portfolio of more than \$3.5 million.

State Hail Insurance insured 1.5 million acres in 2011, down slightly from the previous year's record 1.9 million acres.

State Grain Laboratory completed nearly 34,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 3,000 inspections on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana. A branch office is situated in Plentywood

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 63 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

Agricultural Sciences Division

Administrator: Greg Ames, (406) 444-2944

Analytical Laboratory Bureau, Bozeman
▪ Tests feed, pesticides, fertilizer, water

Commodity Services Bureau
▪ Anhydrous Ammonia
▪ Feed/ Fertilizer
▪ Grain Warehouses & Auditing
▪ Organic Certification
▪ Produce/ Seed/ Seed Potatoes

Pest Management Bureau
▪ Apiary/ Alfalfa Leaf Cutter Bees

▪ Export Certification
▪ Noxious Weeds
▪ Noxious Weed Seed Free Forage
▪ Nursery/ Quarantine
▪ Cooperative Ag Pest Survey

Technical Services Bureau
▪ Groundwater
▪ Licensing and Registration
▪ Pesticides
▪ Special Pesticide Registrations
▪ Vertebrate Pests

The Department:

- Licenses about 800 pesticide dealers and registers about 10,300 pesticide products.
- Licenses about 6,400 private and 2,000 commercial and government pesticide applicators.
- Certifies 74 commercial honeybee operations and registers 5,200 apiary locations.
- Issues 1,000 plant health and export certificates, enabling products to be shipped to other states and countries.
- Licenses 1,000 nurseries to assure quality products.
- Issues 3,000 inspection certificates on 261 million pounds of potatoes shipped for seed.

Analytical Laboratory, operated jointly with MSU at Bozeman, reports about 125,500 individual test results annually on 3,200 feed, fertilizer, soil, plant tissue and water quality samples.

Pesticide Disposal program assists homeowners, businesses and producers in disposing of unwanted and unusable pesticides - a total of 377,000 pounds since 1994.

Fertilizer program registered more than 3,300 fertilizer and soil amending products and licensed 211 in-state and 226 out-of-state businesses in 2011. Reports indicate 800,000 tons of fertilizer were distributed in Montana during 2010.

Organic program annually inspects and certifies 107 farms and ranches and 35 food handlers as compliant with USDA organic standards. Organic certification allows access to local, national and international value-added markets for organic food products.

Noxious Weed Trust Fund annually distributes more than \$2 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

Board, Councils and Committees

The department receives advice from, and has attached to it, the following:

- Agriculture Development Council
- Alfalfa Seed Committee
- Cherry Advisory Committee
- Hail Insurance Board
- Mint Committee
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee

Crop, Livestock, and Weather Digest, 2010

January: Montana received light to moderate precipitation during the month. Temperatures were above normal, with highs mostly in the 40s and 50s and lows ranging from negative 30s to positive teens. At month's end, winter wheat crop conditions were fair to good. Snow cover protectiveness for the crop was 66 percent good to excellent and wind, freeze, and drought damage was minimal. Topsoil moisture conditions were 69 percent adequate and surplus and subsoil moisture conditions were 55 percent adequate and surplus. Due to continued snowfall, most livestock received supplemental feeding at the end of the month.

February: Temperatures during February were above normal in western Montana and below normal in the eastern portion of the state. Superior and Thompson Falls reached the monthly high temperature of 59 degrees and Glendive had the monthly low of minus 26 degrees. Precipitation was below normal. Winter wheat crop conditions were fair to good at the end of the month. Calving and lambing were underway at 15 percent and 9 percent complete, respectively. Most livestock continued to receive supplemental feeding.

March: The month was unseasonably mild with below average precipitation. Hardin and Huntley reached the monthly high temperature of 75 degrees and Wisdom had the monthly low of minus 9 degrees. At month's end, winter wheat crop conditions were fair to good. Sixty-seven percent of pastureland was open for grazing, compared to eleven percent last month and forty percent last year. Ranchers continued to give supplemental feed to most livestock. Calving and lambing were 45 percent and 27 percent complete, respectively, by the end of the month.

April: Some areas of Montana received significant amounts of precipitation the first week, while others received none. The next week brought little moisture to the state, but adequate precipitation prevailed the next two weeks. April ended with one of the most intense storms in years. Strong winds and heavy precipitation affected most of the state. Up to four feet of heavy snow fell in the Mission Mountains and Little Belts. Winter wheat crop conditions were good to excellent at the end of the month. Spring planting was well underway. Calving and lambing were in full swing.

May: Wet, cold, and snowy conditions kept farmers out of the fields for most of the first week. Warm, dry weather mid-month allowed producers to make good progress with spring seeding. The last week brought widespread precipitation to the state. Topsoil moisture conditions were 98 percent adequate and surplus and subsoil moisture conditions were 85 percent adequate and surplus at month's end, both well ahead of last year and the five-year average. Winter wheat crop conditions continued to be good to excellent. Calving was complete and lambing was nearly complete. The movement of livestock to summer ranges was well underway by the end of the month.

June: Montana received considerable amounts of precipitation during the first three weeks in June. A rare tornado in Billings on the 20th caused limited crop damage in the surrounding area. Warmer temperatures and sunnier skies the rest of the month allowed crops to develop. Winter wheat crop conditions were good to excellent at the end of the month. Spring grains were in good to excellent condition. The first cutting of alfalfa and other hay was behind last year and the five-year average, due to the cool, wet weather of previous weeks. Ranchers had moved nearly all cattle and sheep to summer pastures by month's end.

July: High temperatures were mostly in the upper 80s and lower 90s during the month. Some areas in eastern Montana

had above average moisture, but overall, the state had below normal precipitation for July. Farmers began harvesting winter wheat at month's end, later than the five-year average. The first cutting of alfalfa and other hay was nearing completion and the second cutting of alfalfa hay had just started. Range and pasture feed conditions were good to excellent.

August: Montana received light to moderate precipitation the first week. Several areas reported over one inch of rain the second week. Hot, dry conditions mid-month helped harvest and crop progress. Widespread rain fell across the state during the last week. Winter wheat harvest was 85 percent complete at month's end, the same as last year but behind the five-year average of 95 percent. Harvest of other small grains was underway. By the end of the month, spring and durum wheat harvest was close to last year's progress, but well behind the five-year average. The second cutting of alfalfa and other hay was in full swing.

September: Wet, cool weather across Montana the first two weeks slowed harvest of spring crops. Winter wheat harvest was wrapped up by mid-month. Limited precipitation and warmer temperatures prevailed the next two weeks. Winter wheat seeding was progressing at month's end, though behind last year and the five-year average. The second cutting of alfalfa hay was nearly complete. Movement of livestock from summer pastures was well underway.

October: Montana had unseasonably warm, dry weather for much of the month. Small grain harvest was finished and winter wheat seeding was nearly complete by the third week. Near normal temperatures prevailed the last week, along with light to moderate precipitation. Sugar beet harvest was nearing completion at month's end, ahead of last year and the five year average. Eighty-three percent of cattle and calves and eighty-seven percent of sheep and lambs were moved from summer ranges.

November: Temperatures were above normal the first week of November and near normal the next two weeks. The weather was bitterly cold the last week. Ryegate reached the high temperature for the month at 79 degrees and Chester had the low at minus 32 degrees. Monthly precipitation totals were above average in many areas of the state. Due to heavy snowfall and extremely cold temperatures, 76 percent of cattle and calves and 80 percent of sheep and lambs received supplemental feed at month's end, significantly more than last year. Most livestock had been moved from summer ranges.

December: Montana had ample snowfall during December. West Yellowstone received the most accumulated moisture for the month at 5.34 inches. Temperatures were near normal in most areas. Stanford reached the high temperature for the month at 57 degrees and Wisdom had the low of minus 33 degrees. Winter wheat had good snow cover and wind, freeze, and drought damage was minimal. At month's end, winter wheat crop conditions were 72 percent good to excellent, well ahead of last year's 34 percent. Ninety-four percent of cattle and sheep received supplemental feed.

1/ Farms are places that had or would have had annual sales of agricultural products of \$1,000 or more.

2009 On-Farm Renewable Energy Production Survey

According to 2009 On-Farm Energy Production Survey:

- Montana has 63 wind turbine farms
- 226 PV Solar Panel farms
- 35 Thermal Solar Panel farms
 - saved \$1,737 on 2009 utility bills
 - 25 farms perform energy audits
 - 47 farms received federal funding
- Montana ranked in the top five for the number of Wind Turbines

You can find the complete On-Farm Energy Production Publication online at http://www.agcensus.usda.gov/Publications/2007/Online_Highlights/On-Farm_Energy_Production/.

2009 Montana Solar Panels Installed

2010 Postharvest Chemical Use on Wheat Survey

According to 2009-2010 Wheat Postharvest Chemical Use:

In the summer and fall of 2010, NASS collected data about pesticide applications on all wheat and pest management practices for all grains handled at off-farm storage facilities. This postharvest survey was conducted for wheat marketed from June 1, 2009 through May 31, 2010. These results are based on 1,634 reports from operators in 14 program states: Colorado, Idaho, Kansas, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Texas, and Washington.

Montana had 165.9 million bushels of winter wheat treated for insecticides or fungicides.

- 1.6% treated for insecticides
- 0.8% treated for fungicides
- Difenoconazole mostly used fungicide
- Aluminum Phospide mostly used insecticide

You can find the complete Wheat Postharvest Chemical Use Publication online at http://www.nass.usda.gov/Surveys/Guide_to_NASS_Surveys/Chemical_Use/.

Mechanical and Cleaning Practices Used for Pest Management in Montana

Agriculture Remains Montana's Number One Industry in 2010

A comparison of selected Montana industries shows Agriculture continues to outpace all other industry sectors, although most sectors saw increased activity. The 2010 value of crop production increased to \$1.9 billion, an increase of \$228.2 million or 14 percent above 2009. The value of livestock increased in 2010 to \$1.0 billion, up \$193.3 million from 2009. Net government payments increased 223 percent in 2010 to \$123 million, up \$67.8 million from 2009.

When comparing major industrial sectors in Montana, receipts were mostly higher than a year ago. Agriculture showed a 9 percent increase, up \$297.4 million from 2009. Mining showed a 23 percent increase, up \$267.5 million from the previous year. Gas & Oil showed an increase of 18 percent, up \$321 million from 2009. Non-residential Travel showed an increase of 12 percent in 2010, up \$189.9 million from 2009. Wood and Paper Products decreased 41 percent or \$225 million below 2009.

Selected Montana Industries Comparison

Industry	2008	2009	2010	2010/2009

1/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

2/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. -- Not available.

Montana Agricultural Exports Increased \$320 Million in 2010

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 2010, totaled \$1,240.0 million, \$319.7 million above 2009. Wheat and Products remained Montana's leading export, making up 53 percent of the state's agricultural exports. Feeds and Fodders were the second leading export accounting for 27.5 percent of the total. Vegetables and Preparations, which includes dry beans, dry peas, lentils, and fall potatoes, was in third place with 11.3 percent, and the Feed Grains and Products category came in fourth with 4.9 percent of total Montana exports.

Montana agricultural commodity exports were mostly higher in 2010. Feeds and Fodders showed the largest change in value, up \$157.2 million. Wheat and Products exports increased \$100.2 million from 2009, but Feed Grains and Products were down \$3.6 million. Vegetables and Preparations increased \$68.4 million, while Seeds decreased \$4.2 million. Live Animals and Meat decreased \$2.0 million from 2009.

Montana maintained third place among states exporting Wheat and Products for fiscal year 2010. The top wheat exporting states for 2010 were Kansas, North Dakota, Montana, Texas, Washington, Minnesota, Oklahoma, Colorado, South Dakota, and Idaho. Considering exports of all products, California remained first, followed by Iowa, Texas, Illinois, Nebraska, Minnesota, Kansas, Indiana, North Dakota, and Missouri. Montana was moved up two places from the previous fiscal year to twenty-sixth in 2010 for exports of all products.

U.S. agricultural exports in fiscal 2010 totaled \$108.7 billion, which is \$12.4 billion higher than fiscal 2009. The export value for Wheat and Products is 1 percent above 2009 at \$8.7 billion. Exports showed increases in most categories with exceptions in Feed Grains and Products and Live Animals and Meat. The largest increases in U.S. exports occurred in Hides and Skins, followed by Fats, Oils and Greases, and Feeds and Fodders. Soybeans and Products remained the largest valued agricultural export commodity in 2010 at \$22.1 billion—an increase of \$4.5 billion from fiscal 2009.
