## *On the Cover*

The cover photo was taken on a Forest Service Permit held by Helle Land and Livestock in the Gravelly Range of Southwest Montana. For three generations, their Rambouillet sheep have made the long trail from Dillon into the mountains for summer pasture. It is one of the few places left in the state where one can see the benefits of running sheep on our public forest lands. The sheep help reduce fuel loads, freshen the forage for migrating elk herds, and produce sustainable and renewable lamb and wool for American consumers.

## STATE CROPS

- 28 Crops Summary  
Usual Planting and Harvesting Dates
- **Acreage, Production, and Value -**
- 29 All Wheat, Winter Wheat, and Durum Wheat
- 30 Other Spring Wheat, All Barley, and Oats
- 31 Corn, Potatoes, and Sugar Beets
- 32 Dry Beans (All, Pinto, and Garbanzo) and Lentils
- 33 Dry Peas (All and Austrian Winter Peas), Canola, Camelina,  
and Mustard Seed
- 34 Flaxseed, Safflower, Sweet Cherries, and Leaf Cutter Bees
- 35 Alfalfa Seed and Hay (All, Alfalfa, and Other)
- 36 Grain Movement
- 37 Wheat Utilization
- 38 All Wheat, All Barley, & Oats Stocks  
All Barley Varieties, Historic
- 39 All Wheat Varieties, Historic
- 40 Winter Wheat Varieties
- 41 Spring Wheat Varieties
- 42 Durum Wheat Varieties
- 43 Barley Varieties
- 44 Barley Purchased for Malt

## COUNTY CROPS

### - Planted, Harvested, Yield, and Production -

- 45 Winter Wheat
- 48 Spring Wheat
- 51 Durum Wheat
- 52 All Barley
- 54 Oats
- 55 Corn
- 56 Dry Beans (All, Pinto, Other, and Garbanzo)
- 57 Dry Peas (All and Austrian Winter Peas)
- 58 Lentils  
Potatoes  
Sugar Beets
- 59 Canola  
Flaxseed  
Mustard Seed  
Safflower
- 60 Hay (Alfalfa and Other)

## STATE LIVESTOCK

### - Cattle and Calves -

- 62 Inventory by Class, Cattle on Feed, and Value  
Calf Crop and Disposition  
Private Grazing Fee Rates  
Production and Income
- 63 Dairy Products Marketed, Income, and Value

### - Sheep, Lambs, and Goats -

- 63 Milk, Meat, and Other Goats  
All Sheep Inventory by Class and Value  
Lamb Crop and Disposition  
Wool Production and Value
- 64 Death Loss and Percent of Total Inventory Lost  
Death Loss by Cause and Value of Loss
- 65 Percent of Loss by Cause

### - Hogs and Pigs -

- 66 Inventory by Class and Value  
Annual Farrowings and Disposition  
Production and Income

### - Chickens, Eggs, and Honey -

- 67 Chicken Inventory, Value, Production, and Income  
Eggs Production and Value  
Honey Inventory, Production, Stocks, and Value

### - Commercial Livestock Slaughter -

- 68 Commercial Red Meat Production  
Monthly Slaughter by Class

## COUNTY LIVESTOCK

### - County Inventory by Head -

- 69 All Cattle and Calves  
Beef Cows and Heifers
- 70 Milk Cows and Heifers
- 71 All Sheep and Lambs
- 72 Hogs and Pigs

**COMMENTS FROM  
OUR GOVERNOR**

Montana Agriculture is constantly changing. Evolving weather patterns, consumer preferences, and an increasingly global marketplace have allowed producers and businesses to take advantage of these transitions.

Businesses like new pea and lentil buyers and processors provide farmers with more choices as to where to sell their crops. Montana became the leading producer of these "pulse crops" two years ago, and we've held that position since. Wheat and beef remain our top commodities, but diversification has helped with disease and weed control, while reducing dependence on fertilizer.

Organic and locally grown food has added much value to Montana's number one industry. Many of these agriculture businesses are finding wider markets that promote Montana's reputation of being a pristine environment with top quality grains, beef and other products.

We can count on Montana's farmers, ranchers and agriculture businesses to find and profit from the opportunities that arise from agricultural transitions. If you have ideas or suggestions for business opportunities, feel free to send me a note on the [www.governor.mt.gov](http://www.governor.mt.gov) website, or give my office a call at 444-3111.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Bullock". The signature is fluid and cursive, with a long horizontal flourish extending to the right.

Steve Bullock  
Governor

**MESSAGE FROM  
THE DIRECTOR**

Montana agriculture is becoming more diverse and continuing to add value to products that are available both locally and globally. Increasing production of corn and soybean crops that have been genetically modified will continue to expand opportunities for Montana producers, but also will require more advance planning and neighborly consideration.

A majority of the nation's corn, soybeans and canola crops contain genes that confer herbicide resistance or defenses against insects. Coexistence between genetically modified, conventionally grown and organic crops requires that measures be taken to prevent comingling of GMO crops and identity-preserved or organically certified crops. Good neighbor efforts to avoid contamination can enable GMO and identity-preserved crops to co-exist, allowing each farmer to grow and market his or her desired products, which are often sold for a premium price.

The Montana Department of Agriculture is working hard to increase exports and domestic sales of value-added and identity preserved products. Our Food & Agriculture Development Network centers work with agricultural entrepreneurs to develop professional business and marketing plans, secure necessary permits and start initial processing. The amount of Montana food consumption coming from Montana production and processing is increasing. Visit a local farmers market to see some of the food items your neighbors are creating to help grow Montana's agricultural economy.

Updates to this annual Montana Agricultural Statistics bulletin, produced in cooperation with the National Agricultural Statistics Service, are available electronically at [www.nass.usda.gov/mt](http://www.nass.usda.gov/mt).

Sincerely,

Ron de Yong, Director, Montana Department of Agriculture

I proudly introduce the 50<sup>th</sup> edition of the Montana Agricultural Statistics Bulletin. Mild winter and hot dry summer conditions led to a very interesting growing season. This publication gives farmers and ranchers an opportunity to share the ever changing face of agriculture with legislators, agribusinesses, academics, reporters, and producers.

The 2012 Census of Agriculture results will be released early 2014! NASS will release Census data in both electronic and print formats. At the end of 2012, nearly 40,000 agricultural operations and potential agricultural operations within the State of Montana were mailed a questionnaire.

Working cooperatively within Montana allows USDA National Agricultural Statistics Service (NASS) the ability to achieve the goal of providing timely, accurate, and useful statistics in service to U.S. agriculture. NASS partners with Montana Department of Agriculture, Montana Wheat and Barley Committee, Montana Woolgrowers Association, and the Montana Alfalfa Seed Committee, among others.

Thank you to all of Montana's farmers, ranchers, and agribusinesses that made this publication possible. I would also like to recognize National Association of State Departments of Agriculture employees across the state and the NASS staff (current and recently retired) for everything you did to make this publication possible.

**NOTES FROM  
THE STATE STATISTICIAN**

Eric Sommer, State Statistician, USDA, NASS, Montana Field Office

**Department Mission**

*"To protect producers and consumers and to enhance and develop agriculture and allied industries."*

**Director Ron de Yong, (406) 444-3144**

Central Services Administrator: Libbi H. Lovshin  
Attorney: Cort Jensen

**Department Programs & Background**

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums and works to make the department's programs accessible to the public.

**Agricultural Development Division**

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

**Ag Marketing & Business Development Bureau**

- Marketing and Business Assistance
- Grants and Loans

**Wheat & Barley Bureau, Great Falls**

- Producer Funded Research & Marketing
- Hosts Foreign Buyers and Delegations

**Rural Development Bureau**

- Agricultural Curriculum Development
- Agricultural Finance
- Agricultural Statistics
- Commodity Check-off Programs
- State Hail Insurance

**State Grain Laboratory, Great Falls**

- Federally Licensed Grain Inspection

**Food and Agriculture Development Centers** assisted 132 clients with regional food and farm-derived energy projects in FY 2012, helping to introduce 47 new products, start 19 new businesses and assist 24 business expansions.

**Growth Through Agriculture** grants and loans during FY 2013 totaled more than \$450,000 to 40 businesses and individuals for value-added agriculture projects.

**Marketing assistance** during FY 2013 included more than 40 one-on-one company consultations; about \$90,000 in trade show sales; and 18 promotions in out of state trade shows.

**Rural Development** finance programs have a combined loan portfolio of more than \$3.5 million.

**State Hail Insurance** protected 1.8 million acres in 2012, an increase from the previous year's record 1.5 million acres.

**State Grain Laboratory** completed nearly 37,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 3,000 inspections on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana. A branch office is situated in Plentywood.

**Wheat & Barley Committee** annually hosts an average of 13 foreign trade delegations and 60 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

## **Agricultural Sciences Division**

Administrator: Greg Ames, (406) 444-2944

### **Analytical Laboratory Bureau, Bozeman**

- Provides testing services for feed, fertilizer, pesticide and ground water programs.

### **Commodity Services Bureau**

- Anhydrous Ammonia
- Feed/Fertilizer
- Grain Warehouses and Auditing
- Organic Certification
- Produce/Seed/Seed Potatoes

### **Pest Management Bureau**

- Apiary/Alfalfa Leaf Cutter Bees
- Export Certification
- Noxious Weeds
- Noxious Weed Seed Free Forage
- Cooperative Ag. Pest Survey
- Nursery/Quarantine

### **Technical Services Bureau**

- Ground Water
- Licensing and Registration
- Pesticides
- Special Pesticide Registration
- Vertebrate Pests

### **The Department:**

- Licenses about 500 pesticide dealers and registers about 11,000 pesticide products.
- Licenses about 6,200 private and 2,000 commercial and government pesticide applicators.
- Certifies 74 commercial honeybee operations and registers 5,600 apiary locations.
- Issues 1,000 plant health and export certificates, enabling products to be shipped to other states and countries.
- Licenses 900 nurseries to assure quality products.
- Issues 3,100 inspection certificates on 283 million pounds of potatoes shipped for seed.

**Analytical Laboratory**, operated jointly with MSU at Bozeman, reports about 125,500 individual test results annually on 3,200 feed, fertilizer, soil, plant tissue and water quality samples.

**Pesticide Disposal program** assists homeowners, businesses and producers in disposing of unwanted and unusable pesticides - a total of 424,821 pounds since 1994.

**Pesticide Container Recycling Program** was created to keep pesticide container plastic out of Montana's landfills. The PCRPP truck will arrive at predetermined collection sites to collect and grind all cleaned and prepared #2 HDPE pesticide plastic. The program has collected approximately 210,000 pounds since 2009.

**Fertilizer program** registered more than 3,800 fertilizer and soil amending products and licensed 217 in-state and 291 out-of-state businesses in 2012. Reports indicate 700,824 tons of fertilizer were distributed in Montana during 2012.

**Organic program** annually inspects and certifies 107 farms and ranches and 35 food handlers as compliant with USDA organic standards. Organic certification allows access to local, national and international value-added markets for organic food products.

**Noxious Weed Trust Fund** annually distributes more than \$2 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

### **Board, Councils and Committees**

- Agriculture Development Council
- Alfalfa Seed Committee
- Cherry Advisory Committee
- Hail Insurance Board
- Noxious Weed Management Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Council
- Pulse Crop Advisory Council
- Wheat & Barley Committee

## Crop, Livestock, and Weather Digest, 2012

**January:** Montana had unseasonably warm weather for January. High temperatures reached the mid 60s, while average low temperatures were in the mid 20s to lower 30s. Many areas had below average precipitation, while other parts of the state received above normal moisture. At month's end, snow cover protectiveness on winter wheat fields was 87 percent very poor to poor. Winter wheat crop conditions were 26 percent good to excellent, significantly behind last year's 72 percent. Most livestock received supplemental feeding. Calving and lambing had just begun at the end of the month.

**February:** Montana continued to have mild weather with variable precipitation in February. Fort Benton reached the monthly high temperature of 56 degrees and Wisdom had the monthly low of minus 24 degrees. West Glacier had the most monthly accumulated moisture at 2.77 inches. Snow cover protectiveness on winter wheat fields remained very poor to poor. At month's end, winter wheat crop conditions were 24 percent good to excellent, well behind last year's 71 percent. Calving and lambing were 14 percent and 6 percent complete, respectively.

**March:** Temperatures were above normal during the month, with scattered precipitation. High temperatures ranged from the upper 50s to the upper 70s. Lakeview received the most accumulated moisture for the month at 3.37 inches. At month's end, topsoil and subsoil moisture conditions were 61 percent and 57 percent adequate and surplus, respectively, well behind last year. Winter wheat was rated 28 percent good to excellent, compared to last year's 64 percent. Calving and lambing were in full swing by the end of the month. Most livestock continued to receive supplemental feed.

**April:** A late winter storm the first week brought snowfall to most of Montana. Many areas received 0.50 to 1 inch of precipitation. Scattered rain showers and warm spring temperatures prevailed the rest of the month. Miles City reached the monthly high temperature of 91 degrees the last week. Winter wheat crop conditions were 55 percent good to excellent, behind last year's 70 percent. Spring planting was well underway. Calving and lambing were approaching completion. By month's end, supplemental feeding of livestock had decreased and movement to summer pastures had begun.

**May:** The state had warm temperatures and limited precipitation the first week. Hot, windy, and dry weather prevailed the next two weeks, with high temperatures reaching the upper 80s and lower 90s. The last week brought snow, rain, and cooler temperatures. Cooke City received the most precipitation for the week at 2.62 inches. At month's end, winter wheat crop conditions were 51 percent good to excellent, behind last year's 72 percent. Livestock movement to summer ranges was in full swing.

**June:** Temperatures were warm and precipitation was adequate during the first part of June. Hot, dry weather prevailed the rest of the month. Miles City reached the monthly high temperature of 111 degrees the last week. Small grain crop development was ahead of last year and the five-year average. The first cutting of hay was well underway. Ranges and pastures were stressed, due to dry, windy conditions. Livestock movement to summer pastures was wrapped up by month's end.

**July:** Hot, dry weather continued for much of the state during July. High temperatures ranged from the lower 80s to the lower 100s. Winter wheat harvest began the second week and was 30 percent complete by the end of the month, ahead of last year and the five-year average. Harvest of other small grains was underway. At month's end, summer range and pasture feed conditions were 12 percent good, 33 percent fair, and 55 percent very poor to poor.

**August:** Montana had hot temperatures and minimal precipitation until mid-month when much of the state had cooler temperatures and measurable moisture. Hot, dry weather returned the third week and lasted the rest of the month. Winter wheat harvest was wrapped up by month's end and harvest of other small grains approached completion, well ahead of last year and the five-year average. The second cutting of hay was in full swing. Range and pasture feed conditions continued to decline with the prolonged heat and lack of adequate moisture.

**September:** Temperatures were unseasonably warm during September, the fourth consecutive month with above average temperatures. Precipitation was much below normal. Small grain harvest and the second cutting of hay were completed the third week. At month's end, topsoil and subsoil moisture conditions were 96 percent and 94 percent very short to short, respectively. Winter wheat seeding was on pace with last year, at 55 percent planted. Livestock movement from summer ranges was in full swing and supplemental feeding was underway early, due to poor range and pasture feed conditions.

**October:** Temperatures turned cooler and the first snow of the season arrived the first week. Producers reported receiving precipitation in major winter wheat areas mid-month. An early winter storm brought snow to much of Montana the last week of the month. Potato and sugar beet harvest was nearly completed by month's end. Winter wheat was 84 percent planted, behind last year's 94 percent. Livestock movement from summer ranges was nearly wrapped up and supplemental feeding was well underway.

**November:** Montana had mostly warm and dry weather the first week of November. A snow storm brought record amounts of snowfall to several areas the second week. Mild temperatures and limited precipitation prevailed the rest of the month. Winter wheat crop conditions were 29 percent good to excellent at month's end. Due to poor range and pasture feed conditions, 69 percent of cattle and 74 percent of sheep received supplemental feeding, compared to last year's 33 percent and 39 percent, respectively.

**December:** Much of the state had snowfall during the month. West Glacier received the most monthly accumulated precipitation at 4.46 inches of moisture, followed by West Yellowstone at 4.22 inches. Hardin and Joliet tied for the monthly high temperature of 64 degrees, while Scobey had the low for the month at minus 29 degrees. At month's end, winter wheat crop conditions were 40 percent good to excellent, with minimal wind, freeze, and drought damage. Ninety percent of cattle and ninety-six percent of sheep received supplemental feed, ahead of last year's seventy-two percent and sixty-nine percent, respectively.

## Climatological Data Annual and Growing Season Precipitation and Frost-Free Days, 2011-2012

1/ Farms are places that had or would have had annual sales of agricultural products of \$1,000 or more.

## Agriculture Remains Montana's Number One Industry in 2012

A comparison of selected Montana industries shows Agriculture continues to outpace all other industry sectors, although most sectors saw increased activity. The 2012 value of crop production increased to \$2.3 billion, an increase of \$325.1 million or 16 percent above 2011. The value of livestock increased in 2012 to \$1.6 billion, up \$200.6 million from 2011. Net government payments decreased 20 percent in 2012 to \$239 million, down \$59.4 million from 2011.

When comparing major industrial sectors in Montana, receipts were mixed compared to a year ago. Agriculture showed a 9 percent increase, up \$375.6 million from 2011. Mining showed a 1 percent decrease, down \$23.9 million from the previous year. Gas & Oil showed an decrease of 3 percent, down \$62.3 million from 2011. Non-residential Travel showed an increase of 19 percent in 2012, up \$415.1 million from 2011. Wood and Paper Products also saw an increase from 2011, which was up 25 percent or \$114 million.

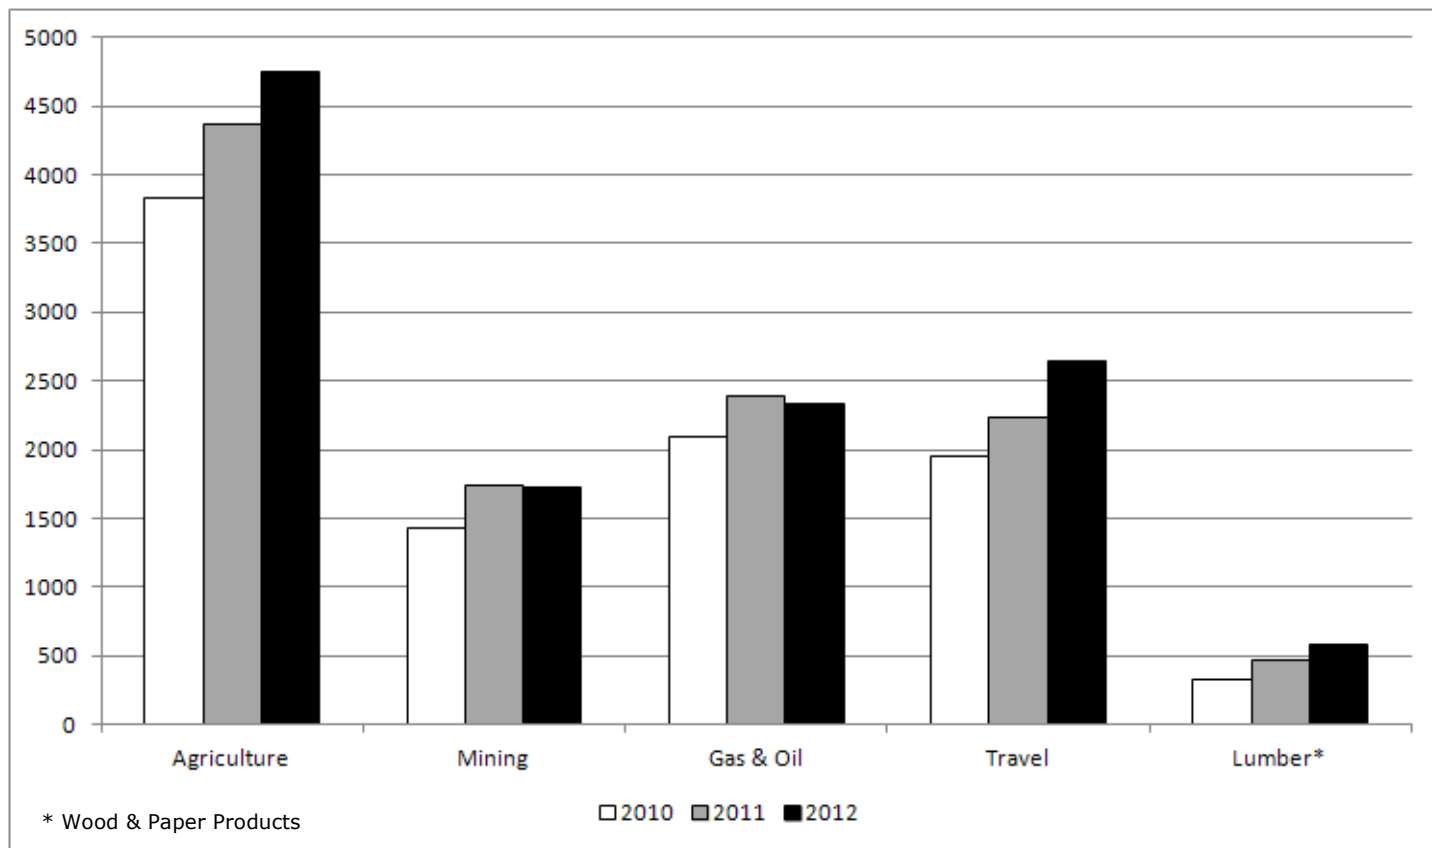

### Selected Montana Industries Comparison

Net farm Income <sup>2/</sup>	588.1	688.1	407.4	735.6	971.1	1,294.9

<sup>1/</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. <sup>2/</sup> Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. <sup>3/</sup> Sheep and Lamb moved to all other livestock beginning in 2011. 1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. 2/ No longer published. -- Not available.
