2014 Agricultural Statistics

2012-2013 County Estimates

Montana Agricultural Statistics Districts

On the Cover

In the foreground, seed potatoes being planted on Schutter Seed Farm in Manhattan, MT. In the background, a potato field.

The Schutter's operate a diversified potato, grain, and pea operation and produce seed potatoes certified through the Montana Certified Seed Potato program. Montana produces around 10,000 acres of seed potatoes annually which accounts for 10 to 15 percent of the seed potatoes in the United States. Montana's mountain valleys are ideal for producing high quality, disease-free seed potatoes by taking advantage of geographical isolation and distance from commercial potato production.

- 67 All Sheep and Lambs
- 68 Hogs and Pigs

**COMMENTS FROM
OUR GOVERNOR**

Agriculture in Montana is growing locally, nationally, and internationally. It is great to see the progress and innovation by our farmers and ranchers. Agriculture is the backbone of our state economy and vital to our rural communities.

The importance of agriculture to our state is part of the reason that it was included in my Main Street Montana Project. The project is designed to leverage Montana's unique strengths, and tackle the challenges that slow business, job, and wage growth. It is a business plan for Montana, created by Montanans.

Part of that plan incorporates promoting and adding value to the agricultural products grown and produced in Montana, as well as incorporating more local food into our schools. We already know we grow the best food in the world – now it is time to promote and integrate high quality Montana products to new markets and add to producers' bottom-line.

As Governor, I am committed to helping Montana's farmers, ranchers, and agriculture businesses find and profit from opportunities that arise. If you have ideas or suggestions for business opportunities, feel free to send me a note on the www.governor.mt.gov website, or give my office a call at (406) 444-3111.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Bullock". The signature is fluid and cursive, with a long horizontal line extending to the right.

Steve Bullock
Governor

**MESSAGE FROM
THE DIRECTOR**

Agriculture in Montana has had quite a run in recent years. Producers continue to find ways to diversify and add value to the products that they grow.

Ingenuity and innovation helped Montana agriculture outperform the nation. With the new five year census of agriculture released earlier this year, we have the metrics to see how agriculture has performed in our state and around the country. Montana producers increased the value of what they sold by 59% from 2007 to 2012, while producers nationally increased their production value by 39%. Montana producers are finding ways to make a go of it in spite of input prices and the economic downturn a few years ago.

In addition to our continued efforts both domestically and internationally, part of what we have focused on at the department has been promoting pulse crops like dry peas and lentils, now valued at over \$100 million annually. In fact, Montana has been the number one producer of dry peas and lentils three years running. The tremendous growth in pulse and other specialty crops has tripled our specialty crop block grant monies from USDA, allowing for more crop research and market development that will continue to move Montana agriculture forward.

Montana still produces the highest quality wheat, durum, sugar beets, barley, and beef among others. The high quality agriculture products we grow and produce continue to be the foundation of our economy and will be for the foreseeable future. You can support your local farmer by purchasing 'Grown in Montana' products.

As always, if you have an idea, contact the department at agr@mt.gov or call (406) 444-3144. Updates to this annual Montana Agricultural Statistics bulletin, produced in cooperation with the National Agricultural Statistics Service, are available electronically at www.nass.usda.gov/mt.

A handwritten signature in black ink that reads "Ron de Yong".

Ron de Yong, Director, Montana Department of Agriculture

I proudly introduce the 51th edition of the Montana Agricultural Statistics Bulletin. The 2013 crop year faced warm and limited precipitation though out the year, but when precipitation was received hail often accompanied the storm. Montana recorded a record amount of acreage damaged by hail.

The 2012 Census of Agriculture was released in May 2014! The Census of Agriculture provides an inclusive look at Montana agriculture at a state and county level. Montana producers have shared their success and the changing face of Montana Agriculture. Take a minute and visit our website to view some of the highlights or the whole report.

Working cooperatively within Montana allows USDA National Agricultural Statistics Service (NASS) the ability to achieve the goal of providing timely, accurate, and useful statistics in service to U.S. agriculture. NASS partners with Montana Department of Agriculture, Montana Wheat and Barley Committee, Montana Woolgrowers Association, and the Montana Alfalfa Seed Committee, among others.

Thank you to all of Montana's farmers, ranchers, and agribusinesses that made this publication possible. Thank you to all the producers and commodity groups that I have the opportunity to meet, work, and socialize with throughout the year. I would also like to recognize National Association of State Departments of Agriculture employees across the state and the NASS staff (current and retired) for everything you do to make this publication possible.

A handwritten signature in black ink that reads "Eric Sommer".

Eric Sommer, State Statistician, USDA, NASS, Montana Field Office

**NOTES FROM THE
STATE STATISTICIAN**

Department Mission

"To protect producers and consumers and to enhance and develop agriculture and allied industries."

Director Ron de Yong, (406) 444-3144

Deputy Director: Joel Clairmont

Central Services Administrator: Libbi H. Lovshin

Attorney: Cort Jensen

Information Specialist: Jayson O'Neill

Department Programs & Background

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums, and works to make the department's programs accessible to the public.

Ag Development & Marketing Bureau

Bureau Chief: Kim Falcon, (406) 444-2402

- Marketing and Business Assistance
- Grants and Loans
- Agricultural Curriculum Development
- Agricultural Finance
- Agricultural Statistics
- State Hail Insurance
- Commodity Check-off Programs

Wheat & Barley Bureau, Great Falls

Executive Vice President: Collin Watters, (406) 761-7732

- Producer Funded Research & Marketing
- Hosts Foreign Buyers and Delegations

State Grain Laboratory, Great Falls

Bureau Chief: Jeff Rumney, (406) 452-9561

- Federally Licensed Grain Inspection

Food and Agriculture Development Centers assisted 132 clients with regional food and farm-derived energy projects in FY 2012, helping to introduce 47 new products, start 19 new businesses and assist 24 business expansions.

Growth Through Agriculture grants and loans during FY 2013 totaled more than \$450,000 to 40 businesses and individuals for value-added agriculture projects.

Marketing assistance during FY 2013 included more than 40 one-on-one company consultations; about \$90,000 in trade show sales; and 18 promotions in out of state trade shows.

Rural Development finance programs have a combined loan portfolio of more than \$3.5 million.

State Hail Insurance protected 1.9 million acres in 2013, above the previous year's 1.8 million acres.

State Grain Laboratory completed nearly 37,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 3,000 inspections on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana. A branch office is situated in Plentywood.

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 60 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

Agricultural Sciences Division

Administrator: Greg Ames, (406) 444-2945

Analytical Laboratory Bureau, Bozeman

Bureau Chief: Heidi Hickes, (406) 994-3383

- Provides testing services for feed, fertilizer, pesticide and ground water programs.

Commodity Services Bureau

Bureau Chief: Andy Gray, (406) 444-3730

- Anhydrous Ammonia
- Feed/Fertilizer
- Grain Warehouses and Auditing
- Organic Certification
- Produce/Seed/Seed Potatoes
- Cooperative Ag. Pest Survey

Agricultural Services Bureau

Bureau Chief: Donna Rise, (406) 444-5400

- Apiary/Alfalfa Leaf Cutter Bees
- Noxious Weeds
- Noxious Weed Seed Free Forage
- Nursery/Quarantine
- Ground Water
- Pesticide Licensing and Registration
- Pesticide Recycling & Disposal
- Pesticide Compliance
- Driftwatch
- Vertebrate Pests

The Department:

- Licenses about 500 pesticide dealers and registers about 11,000 pesticide products.
- Licenses about 5,800 private and 2,000 commercial and government pesticide applicators.
- Certifies 74 commercial honeybee operations and registers 5,600 apiary locations.
- Issues 1,000 plant health and export certificates, enabling products to be shipped to other states and countries.
- Licenses 900 nurseries to assure quality products.
- Issues 2,995 inspection certificates on 275 million pounds of potatoes shipped for seed.
- Licensed about 950 feed manufacturer/distributors and registered about 7,500 pet food products.

Analytical Laboratory, operated jointly with MSU at Bozeman, reports about 125,500 individual test results annually on 3,200 feed, fertilizer, soil, plant tissue and water quality samples.

Pesticide Disposal program assists homeowners, businesses and producers in disposing of unwanted and unusable pesticides - a total of 424,821 pounds since 1994.

Pesticide Container Recycling Program was created to keep pesticide container plastic out of Montana's landfills. The PCRCP truck will arrive at predetermined collection sites to collect and grind all cleaned and prepared #2 HDPE pesticide plastic. The program has collected approximately 210,000 pounds since 2009.

Fertilizer program registered more than 3,800 fertilizer and soil amending products and licensed over 500 businesses in 2013. Reports indicate over 700,000 tons of fertilizer was distributed in Montana during 2013.

Organic program annually inspects and certifies 105 farms and ranches and 46 food handlers as compliant with USDA organic standards. Organic certification allows access to local, national and international value-added markets for organic food products.

Noxious Weed Trust Fund annually distributes more than \$2 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

Board, Councils and Committees

- Agriculture Development Council
- Alfalfa Seed Committee
- Cherry Advisory Committee
- Hail Insurance Board
- Mint Committee
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee

Crop, Livestock, and Weather Digest, 2013

January: Montana had cold weather with occasional snow storms in January. Average low temperatures were 6 degrees to lower 30s, while high temperatures ranged from the upper 30s to the upper 50s. West Yellowstone had the monthly low of minus 39 degrees. At month's end, snow cover protectiveness on winter wheat fields was 66 percent fair to excellent, compared to last year's 13 percent. Winter wheat crop conditions were 41 percent good to excellent, with minimal wind, freeze, and drought damage. Most livestock received supplemental feeding. Calving and lambing had just begun at the end of the month.

February: The state was warmer than last month, with average low temperatures in the lower 20s to mid 30s. High temperatures ranged from the upper 30s to the upper 50s. West Yellowstone had the monthly low of minus 25 degrees, followed by Cooke City and Plentywood at minus 24 degrees. Snowfall was below normal in most areas. At the end of the month, winter wheat crop conditions were 38 percent good to excellent, with little wind, freeze, and drought damage. Most livestock continued to receive supplemental feeding. Calving and lambing were 16 percent and 8 percent complete, respectively, by month's end.

March: Montana was mostly dry during March, except for the northeast area which received near to above normal snowfall. Temperatures were below normal, with lows well below zero to the upper teens during the last week in March. Topsoil and subsoil moisture conditions were 57 percent and 47 percent adequate, respectively, at month's end. Winter wheat crop conditions were 50 percent good to excellent, ahead of last year and the five-year average. Despite cold weather, calving and lambing were in full swing by the end of the month. Nearly all livestock continued to receive supplemental feeding.

April: The first week of April was warm with limited precipitation. Wet, cold, and snowy conditions delayed spring planting for the next two weeks. Warm, dry weather allowed producers back into the fields at the end of the month. Winter wheat crop conditions were 57 percent good to excellent. Calving and lambing were approaching completion. At month's end, range and pasture feed conditions were well below last year and the five-year average. Livestock movement to summer ranges had just begun.

May: Montana was warm and dry the first half of the month. Field work was well underway and producers made good progress seeding spring crops. Cool, rainy weather prevailed the last half of the month. Winter wheat conditions were mostly good to excellent, but crop development lagged behind last year and the five-year average. Range and pasture feed conditions improved with all the rain. Livestock movement to summer ranges was well underway by month's end.

June: The state had both cool, rainy weather and warm, sunny days during June. Some producers reported severe thunderstorms with hail. The first cutting of hay began mid-month. Winter wheat crop conditions were 68 percent good to excellent at the end of the month, with 87 percent of the crop headed. Spring grains were in good to excellent condition. Ranchers had moved nearly all cattle and sheep to summer pastures by month's end.

July: The weather was hot and dry during the month. High temperatures ranged from the upper 70s to low 100s. A series of thunderstorms caused hail damage to wheat and pulse crops in several areas of the state. Flash flooding occurred in some locations. Hot, sunny days helped crop development considerably. Farmers began harvesting winter wheat toward the end of the month. The first cutting of alfalfa and other hay was nearing completion. Range and pasture feed conditions were 51 percent good to excellent, significantly higher than last year.

August: Montana had warm weather with scattered precipitation during the first part of August. Some areas of the state received heavy rains and hail mid-month, while other parts remained dry. Producers reported moderate to severe hail damage to crops. Hot, dry conditions prevailed the rest of the month. Winter wheat harvest was nearly wrapped up and harvest of other small grains was in full swing by month's end. The second cutting of alfalfa and other hay was approaching completion. Movement from summer pastures was underway.

September: September was a wet month with hot days changing to cooler, autumn weather during the last couple of weeks of the month. Afternoon storms delayed harvest in several areas of the state but provided good soil moisture conditions for next season's winter wheat seedings. Ranchers began moving livestock off summer ranges at a much slower pace than the previous year thanks to above average range conditions.

October: Montana had mostly mild days and cold nights with precipitation in the form of both rain and snow throughout the month of October. The combination of mild conditions and scattered precipitation delayed the need to provide livestock with supplemental feed and allowed ranchers to continue slowly moving their animals from summer pastures. Rain continued to slow corn harvest but provided ideal conditions for winter wheat planting and emergence.

November: The month of November was windy with above average day temperatures and the occasional snow storm across much of the state of Montana. Producers wrapped up winter wheat seeding and have some concern over the lack of snow cover leading into the winter. Ranchers largely finished moving livestock off summer ranges but were still not doing a lot of supplemental feeding due to decent pasture conditions.

December: The beginning of December saw a prolonged cold snap of subzero temperatures intensified by significant wind chill factors, freezing rain in some locations, and snow fall. The second half of the month was much more mild and dry but many areas still had high winds. Due to these extreme conditions, most ranchers were providing supplemental feed to their livestock by the end of the month. Winter wheat came through the month largely unscathed thanks to mostly adequate snow cover prior to the deep freeze.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. 2/ No longer published. -- Not available.
