**COMMENTS FROM
OUR GOVERNOR**

Welcome to this year's edition of Montana 2015 Agricultural Statistics. Montana agriculture is the backbone of our state's economy and vital to our rural communities. Farmers and ranchers across the state continue to show their resiliency by diversifying and adapting. Agriculture helped our state's economy continue to grow at record pace, with low unemployment and historic wage growth.

We are always working to advance, promote and increase agriculture in Montana. In addition to the Main Street Montana Project, two state-funded research grants were awarded to Montana State University College of Agriculture. These projects are going to look at developing precision agricultural techniques geared towards our state and converting more fallow ground into pulse production.

We are excited to continue to lead the nation in pulse production, and be a leader in high-quality wheat, barley, and beef genetics production among others. Through innovation and adaptive technologies, we can continue to increase yields more efficiently and effectively.

Thank you to all our farmers and ranchers for the work they do to provide the world with affordable, safe, healthy food. As always, if you have ideas or suggestions for agriculture development or business opportunities, feel free to send me a note on the www.governor.mt.gov website, or give my office a call at (406) 444-3111.

Sincerely,

A handwritten signature in blue ink, appearing to read "Steve Bullock". The signature is fluid and cursive.

**MESSAGE FROM
THE DIRECTOR**

Montana agriculture continues to lead. Through price fluctuation and extreme weather, agriculture is persevering and growing by diversifying, adapting, and innovating. I am excited for the year ahead as we continue to develop new technologies and expand production.

Again this year, Montana is the leading producer of dry peas and lentils, good rotational crops for wheat. Farmers planted record acres of both of these pulses just in time for the 2016 International Year of the Pulse, which should continue to drive demand for these crops. Montana State University has established a Regional Pulse Diagnostic Lab to help producers identify and control pulse diseases and pests.

Montana still produces the highest quality wheat, sugar beets, barley, beef, seed potatoes, canola, and organics among other crops. As an industry we must continue to look for ways to promote and advance agriculture. Finding niche markets and adding value to the products we raise and grow will only bolster agriculture for years to come.

With renewed emphases on knowing where and how our food is grown, Montana producers are uniquely positioned with our clean water, fresh air, and wide-open spaces to capitalize on our diversified production. We are encouraging folks to support local farmers and ranchers by purchasing 'Grown in Montana' products. The high quality agriculture products grown and produced in Montana continue to be the foundation of our state's economy and rural communities.

If you have an idea, don't hesitate to contact the department at agr@mt.gov or call (406) 444-3144. Updates to this annual Montana Agricultural Statistics bulletin, produced in cooperation with the National Agricultural Statistics Service, are available electronically at www.nass.usda.gov/mt.

Ron de Yong, Director, Montana Department of Agriculture

I proudly introduce the 52th edition of the Montana Agricultural Statistics Bulletin. The 2014 crop year started off looking like a record year for yields. A mid-August storm quickly changed the tune in Montana to one of a tale of two crops: harvested before the storm and harvested after the storm. Problems of sprouting wheat and barley, and moldy hay were encountered almost statewide.

This publication is the collimation of a year's worth of data collection and analysis. While this book is filled with interesting facts and figures, it also contains the story of Montana Agriculture. Many producers volunteered their time and information to give the most current picture of the health of agricultural community.

USDA National Agricultural Statistics Service (NASS) works cooperatively with many partners with many organizations across the state. Using this cooperative agreement gives NASS the ability to achieve the goal of providing timely, accurate, and useful statistics in service to U.S. agriculture. NASS works closely with other federal agencies, the State of Montana, and farm commodity groups in order to produce the best product possible.

Thank you to all of Montana's farmers, ranchers, and agribusinesses that made this publication possible. Thank you to all the producers and commodity groups that I have the opportunity to meet, work, and socialize with throughout the year. I would also like to recognize National Association of State Departments of Agriculture employees across the state and the NASS staff (current and retired) for everything you do to make this publication possible.

Eric Sommer, State Statistician, USDA, NASS, Montana Field Office

Department Programs & Background

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums, and works to make the department's programs accessible to the public.

State Grain Laboratory, Great Falls

Bureau Chief: Jeff Rumney, (406) 452-9561

- Federally Licensed Grain Inspection

Food and Agriculture Development Centers assisted 197 clients with regional food and farm-derived energy projects in FY 2014, helping to introduce 42 new products, start 25 new businesses and assist 29 business expansions.

Growth Through Agriculture grants and loans during FY 2014 totaled more than \$584,000 to 28 businesses and individuals for value-added agriculture projects.

Marketing assistance during FY 2014 assisted 37 companies develop and market their products, contributed about \$60,000 in trade show sales, and facilitated \$1,000,000 in sales from export trade activities.

Rural Development finance programs have a combined loan portfolio of more than \$3.75 million.

State Hail Insurance protected 1.4 million acres in 2014. The program insured nearly \$94 million in crop value.

State Grain Laboratory completed nearly 37,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 3,000 inspections on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana. A branch office is situated in Plentywood.

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 60 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

The Department:

- Licenses about 500 pesticide dealers and registers about 11,000 pesticide products.
- Licenses about 5,800 private and 2,000 commercial and government pesticide applicators.
- Certifies 98 commercial honeybee operations and registers 5,500 apiary locations.
- Issues 1,000 plant health and export certificates, enabling products to be shipped to other states and countries.
- Licenses 1,000 nurseries to assure quality products.
- Issues 3,278 inspection certificates on 302 million pounds of potatoes shipped for seed.
- Licensed about 185 feed manufacturer/distributors and 32 commodity warehouses audited annually.

Analytical Laboratory, operated jointly with MSU at Bozeman, reports about 125,500 individual test results annually on 3,200 feed, fertilizer, soil, plant tissue and water quality samples.

Pesticide Disposal program assists homeowners, businesses and producers in disposing of unwanted and unusable pesticides - a total of 485,512 pounds since 1994.

Pesticide Container Recycling Program was created to keep pesticide container plastic out of Montana's landfills. The PCRPP truck will arrive at predetermined collection sites to collect and grind all cleaned and prepared #2 HDPE pesticide plastic. The program has collected approximately 338,000 pounds since 2009.

Fertilizer program registered more than 4,400 fertilizer and soil amending products and licensed over 590 businesses in 2014. Reports indicate over 780,000 tons of fertilizer was distributed in Montana during 2014.

Organic program annually inspects and certifies 142 farms and ranches and 50 food handlers as compliant with USDA organic standards. Organic certification allows access to local, national and international value-added markets for organic food products.

Noxious Weed Trust Fund annually distributes more than \$2 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

Seed Program renews 667 licenses (334 seed dealers, 58 seed labelers, 30 Montana seed growers, 82 seed conditioning plants, 65 non-resident seed dealers, and 98 non-resident seed labelers) annually.

1/ Farms are places that had or would have had annual sales of agricultural products of \$1,000 or more.

Agriculture Remains Montana's Number One Industry in 2014

A comparison of selected Montana industries shows Agriculture continues to outpace all other industry sectors, although most sectors saw increased activity. The 2014 value of crop production decreased to \$2.2 billion, a decrease of \$360.4 million or 14 percent below 2013. The value of livestock increased in 2014 to \$2.2 billion, up \$487.2 million from 2013.

When comparing major industrial sectors in Montana, receipts were mixed compared to a year ago. Agriculture showed a 1 percent decrease, down \$43.1 million from 2013. Mining showed a 2 percent increase, up \$32.6 million from the previous year. Gas & Oil showed a decrease of 4 percent, down \$113.7 million from 2013. Non-residential Travel showed an increase of 14 percent in 2014, up \$409.4 million from 2013. Wood and Paper Products also saw an increase from 2013, which was up 1 percent or \$8 million.

^{1/} A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. ^{2/} Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. ^{3/} Sheep and Lambs moved to miscellaneous livestock beginning in 2010. ^{4/} Details may not add due to rounding. 1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. 2/ No longer published. -- Not available.
