## **USDA still accepting 2022 Census of Agriculture forms from New England producers**

**HARRISBURG, PA** – The U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) is reminding New England farmers and ranchers that the window is closing on the opportunity to participate in the 2022 Census of Agriculture. NASS is encouraging U.S. producers who have not returned their completed ag census questionnaires to do so as soon as possible to avoid additional mail, phone, email, text, and in-person follow-up, which is currently underway.

“My sincere appreciation is extended to all the producers who have completed the census to date. Without participation from producers like you, the census data cannot accurately reflect the health and well-being of U.S. agriculture,” said NASS Northeastern Regional Director King Whetstone. “There is still time for farmers to respond. When you respond to the census, you are ensuring you are seeing yourself in the data and showcasing the industry you are a part of. Census data drives decision-making at all levels of government. It is an indispensable tool that assists in both developing and administering programs that impact the agricultural community. Simply put, the census is your voice, your future, your opportunity.”

NASS is reminding producers that if they produced and sold \$1,000 or more of agricultural product in 2022, or normally would have produced and sold that much, they meet USDA’s definition of a farm. However, federal law requires everyone who received the 2022 Census of Agriculture questionnaire complete and return it, even if they do not currently meet this definition. Producers can respond online at [agcounts.usda.gov](https://agcounts.usda.gov) or by mail.

“If you received the ag census but do not fit the definition of a farm, are no longer farming, never farmed, or are a landowner who leases your land to a producer, please write your status on the form and mail it back,” said Whetstone.

The Census of Agriculture remains the only comprehensive and impartial source of agriculture data for every state and county in the nation. Census data are used by policymakers, trade associations, researchers, agribusinesses, educators, and many others. The information helps inform decisions on farm

policy, rural development, the development of farm technologies, and more. It also aids in the creation and funding of loans and insurance programs and other forms of assistance.

The ag census differs from other NASS surveys. Beyond being conducted just once every five years, it provides important demographic information and data on certain commodities, such as horses, bison, and Christmas trees, that would not otherwise be available. The Census of Agriculture collects information on nearly every aspect of American agriculture for a complete picture of the health of the industry. Changes to the 2022 questionnaire include new questions about the use of precision agriculture, hemp production, hair sheep and updates to internet access questions.

Federal law under Title 7 USC 2204(g) Public Law 105-113 requires that NASS keep all submissions confidential, use the information for statistical purposes only, and publish aggregate data to prevent disclosing the identity of any individual producer or farm operation.

NASS will release the results of the ag census in early 2024. To learn more about the Census of Agriculture, visit [nass.usda.gov/AgCensus](https://nass.usda.gov/AgCensus). On the website, producers and other data users can access frequently asked questions, past ag census data, special study information, and more. For highlights of these and the latest information, follow USDA NASS on Twitter at [@usda\\_nass](https://twitter.com/usda_nass).
