www.nass.usda.gov/pa Week ending May 6, 2018 Issued weekly on the internet, April - November by the Northeastern Regional Field Office of NASS

nassrfoner@nass.usda.gov Released May 7, 2018

Pennsylvania Weekly Crop Weather - May 6th, 2018:

Pennsylvania had a good week for field activities with an average of 5.5 days suitable for field work. Temperatures were reported with a high of 95° (F), a low of 22° (F) and a state average temperature of 59° (F). Favorable spring weather finally appeared last week, with warmer temperatures allowing ample field work to commence. Fruit has made rapid gains, most notably with apples racing to bloom after weeks of being held back by cold weather. Headway can finally be made with corn and soybean planting in addition to vegetables and sweet corn. Field activities took full advantage of the ideal weather with work focused on corn, soybean, oats and vegetable planting, field spraying and manure spreading in addition to equipment maintenance and repair.

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal.

Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees Fahrenheit. Climate normals used are for the 1981-2010 period.

Notice please be advised, the Weekly Crop Progress and Condition Report's Weather Data Tables may be discontinued for budget reasons. This includes the possibility of discontinuing the weather data narratives and graphics Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. The Weekly Crop Progress and Condition Report's Crop Progress and Condition data will remain and be available.

REPORTERS COMMENTS, By County

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

ADAMS County, Judy A. Behney

Adams County started the week off with morning temperatures 39 and sunny and got to 64 daytime on Monday and very windy. Tuesday was 46 degrees and sunny morning and 87 afternoon. Wednesday was 64 morning and sunny and into the mid 80's. Thursday started 60's and got to 90 and sunny. Some clouds later afternoon/evening but no rainfall. Friday night into Saturday we had an inch of rainfall and then Sunday had 1/4 inch of rainfall so producers will not be in fields for a few days. Temperatures over weekend were cooler mid 50's to 60. The temperatures arrived all this week at once and taken folks time to adjust since hadn't had much warmer temperatures this Spring. Manure is being hauled and fertilizer spread on hay fields. Some corn has been planted now and spraying is occurring for future corn and soybean planting. The producers are eager to get going with their planting of corn and soybeans since now into first week of May. Some areas are still kind of wet but most have dried out this week. Small grains are coming along now and getting some height to them. Hay and pastures are really greening and also getting some height. Some rye was chopped this week. Majority of fruit trees are out in blossom but apples may be next week yet till blooming. Apple producers are watching for Scarf skin and russetting and scab, fire blight and brown rot this week for diseases and spraying accordingly as Penn State Fruit Lab is recommending. The blooms on the fruit trees look good so far but still could have colder temperatures in May but hopefully not. Vegetables are being planted mostly under plastic. Some sweet corn has also been planted around the county. Overall the producers are busy with finishing readying equipment, manure hauling and also will be chopping forage crops and planting at the same time again this year. Weather conditions will keep them on a schedule of trying to get their work done for a good growing season for 2018 crop.

ADAMS/FRANKLIN County, Thomas Kerr

Warm dry weather allowed for long days of field work. Corn planters were busy. Some barlage and rye cut for green chop to allow corn planting. Alfalfa is starting to grow and looks good for now. Apples, peaches, cherries are all in or just past full bloom. Excellent bloom, and no cold weather forecast for now, so should have a good fruit crop.

CENTRE County, Dick A. Decker

Great week for field work. Corn and soybean planting well underway. 1/2 inch of rainfall for the week.

INDIANA County, J. Scott Overdorff

This past week was a very nice week to start getting things going and getting into the fields. Still have not got any oats planted. Just spreading lime and plowing. The ground is just about right for plowing last year's corn and soybean fields. Hopefully there will be some oats planted this week. Weather looks promising. Hope everyone has a safe farming week.

JUNIATA/SNYDER Counties, William C. Sheaffer

A good week for field activities. The planting of corn and soybeans has begun and oats seeding is near completion. The warmer and drier conditions has made an improvement on the condition of the wheat and alfalfa. Planting, sowing and spraying were the main field activities.

LACKAWANNA County, Eric Johnson

A timely change in weather has triggered the start of the planting season. Many operators are out completing spring tillage and getting corn in the ground. Others are getting manure storages empty in advance of the growing season. Peach trees are blooming and apples are not far behind with no potential frost events in sight.

LANCASTER County, Jeff Graybill

The Planters are rolling! Finally the soil is warm enough and fit to plant. See many folks planting both corn and soybeans. Significant amount of ryelage was cut this week with the remainder for next. Alfalfa is finally get taller but will not be cut for another week in most cases. Spring is in full swing!!

MERCER County, James P. Rust

Soil temperature 54 degrees F. Hay fields had fertilizer applied early last week and are finally growing with the warm days and rain.

WESTMORELAND County, Thomas Sierzega

Warmer, drier weather this week allowed for some progress in spring field work. Pastures still very limited growth for this late in the season.
