 $DFN = Departure \ from \ normal.$  Weather summary provided by the Southern Regional Climate Center, https://climdata.srcc.lsu.edu.

# **REPORTERS COMMENTS, By County**

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

#### ADAMS/FRANKLIN Counties, Thomas Kerr

Peach harvest has been better than normal all over, so price and demand has been a little flat. Early apple harvest is below average but not significant at this time. Corn and beans are looking great at this time. Seems to be a lot more corn than soybeans this year.

#### **CENTRE County, Adriana Murillo-Williams**

Centre Co. received 0.75 inches of rain during the week. Soybean are at R1-R2. Pests present in soybean fields are aphids, bean leaf beetles, Japanese beetles, grasshoppers, silver spotted skippers, thistle caterpillars, green clover worms, thrips, and spider mites. Diseases observed in soybeans are brown spot, frogeye, and downy mildew.

#### **CENTRE County, Dick A. Decker**

Great week for field work and growing plants. 1/2 inch rainfall.

#### COLUMBIA County, John O. Yocum

Received 2.5" rain. Crops looking good except for wet areas in fields.

#### **DAUPHIN/PERRY Counties, Liz Bosak**

Hot and dry weather has arrived in Dauphin and Perry counties. Several annual and perennial weeds have started to flower or are mid-flower including marestail, crabgrass, and pokeweed. Double crop soybeans have emerged and are taller than the small grain stubble. Earlier full crop soybean plantings have reached R3 (beginning pod) with June planted soybeans at R1 (beginning flower) or R2 (full flower).

#### JUNIATA/SNYDER Counties, William C. Sheaffer

Everything looks good at this point in time. However, there are small spots of grasshopper damage in the oats and along the edges of the soybean fields. Activities for the week were harvesting and baling straw and hay.

## **LACKAWANNA County, Eric Johnson**

With plenty of heat and moisture, corn is growing like a weed. Farms are enjoying a stretch of dry, hot weather to make good, dry hay. Peaches should be ready to harvest in the coming weeks.

#### **LANCASTER County, Jeff Graybill**

Most areas of the county had an inch or more of rainfall on the weekend of the 21st, nothing since. Crops look very good, however soils are drying out rapidly with the hot sunny weather. Some tobacco has been cut with many more farms to start this week. So far the crop looks quite good overall. Seeing some Bean leaf beetle and Japanese beetle feeding damage in soybean. Also some mild lodging where beans had gotten tall from the June rains. Overall not a lot of disease pressure on either corn or soybeans to report. A nice shower later in the week would benefit most crops.
