REPORTERS COMMENTS, By County

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

ADAMS County, Judy Behney

Adams County started the mornings off around 50 degrees with some mornings dipping to 46 degrees. Daytime temperatures beginning of week were mid 70's but end of week were mid 80's and Sunday was 90 degrees. No significant rainfall received in the county. We are dry. There are fields that were seeded in August and still not emerged. Corn and soybeans continue to mature. Various stages of corn and soybeans. Corn seems to be drying down pretty quick. Had some producers report that they had corn being harvested as grain and the moisture of 26 down to 15.5 percent. Corn silage is also being harvested around the county also. Producers are readying soil after harvest for small grains and/or cover crops but we need some moisture to get things started. Hay continues to be made also. Peach harvest is over but they are still available at roadside markets or farmers markets. Apples continue to be harvested. Some quality issues are apparent and concerns of how the apples will hold up in storage. Vegetables continue to do well and available at roadside markets and farmers markets. Now since fall has arrived pumpkins and gourds are available for use for decorations or for eating. Overall the producers are busy with all different types of field work and harvesting of different crops into different uses. Upper Adams area is preparing for the National Apple Harvest Festival being held the first two full weekends in October near Arendtsville, PA at the South Mountain Fairgrounds. If you want to enjoy anything you can think of made from apples please come and visit to taste the delicious food, arts and crafts and entertainment.

ADAMS/FRANKLIN Counties, Thomas Kerr

Another dry week, but was cooler. Silage harvest is nearly finished, and grain harvest is underway with yields about average. Saw a few fields of soybeans harvested. Pastures are suffering due to dry weather.

BRADFORD County, Casey Guindon

A recent stretch of warm, dry weather has helped crops and field work to progress. Corn silage harvest has slowly begun. Haymaking, manure spreading, and fall tillage were all popular activities across the county this week.

CENTRE County, Dick A. Decker

Great week for field work. No rainfall. Hay making, silo filling and fall grain seeding underway.

COLUMBIA County, John O. Yocum

Dry weather and low humidity has allowed soybean to mature and dry down quickly-harvesting started. Corn stover is also maturing rapidly.

JUNIATA/SNYDER Counties, William C. Sheaffer

The corn and soybeans are maturing rapidly due to the heat and dry weather conditions. Making corn silage is being made at a fast pace and is above average in yield. Activities for the week were mainly silo filling, spreading manure and harvesting crops.

LACKAWANNA County, Eric Johnson

Dry conditions have allowed for a lot of fall planted alfalfa and grass hay seedings. Although the yield was light, most farms have been able to take in 3rd cutting of grass hay and alfalfa. Silage corn should be ready to harvest within the next few weeks as corn is drying down rather quickly.

LANCASTER County, Jeff Graybill

Corn and Soybean yields are excellent this year with some farms experiencing record yields, especially in the northern part of the county. Tobacco has had good drying weather and folks are experimenting with ways to harvest and dry the new CBD Hemp crop. The soil is very dry on top with drought conditions in some areas of the county. Manure hauling is underway with barley, forage rye, and cover crops following suit. A good rain would be appreciated.

MERCER County, James P. Rust

The past six days of excellent weather had the hay balers busy harvesting 3rd cutting hay. The hay was of best quality. Soybeans are changing color with most fields with good yield potential.
