## General

According to the National Agricultural Statistics Service in South Carolina, there were 6.5 days suitable for fieldwork for the week ending Sunday, October 8, 2023. Precipitation ranged from no rain to 1.2 inches of rain. Average high temperatures ranged from the high 60s to the mid 80s. Average low temperatures ranged from the high 40s to the mid 60s.

## Crops

Cool temperatures and dry conditions continued throughout the state over the past week. Corn harvesting neared completion with good yields being reported. Defoliation of cotton continued and harvesting activities began to pick up during the week. Peanuts continued to be dug and harvested at a steady pace. Soybeans were dropping leaves and harvest for early planted varieties was underway. Good weather conditions allowed hay producers to make progress cutting and baling hay. Farmers were waiting on rainfall before bedding up land for fall and winter crops.

## Livestock and Pastures

Cattle were in good to fair condition, while pastures were in mostly fair condition around the state. Limited rainfall over the past few weeks has dried out pastures and hindered seeding of fall grazing crops.
