Issued Monday, June 6, 2022, 3:00 PM

For the Week Ending June 5, 2022

CORN PLANTING NEARS COMPLETION

In West Tennessee, corn planting neared completion, while soybean planting slowed until after winter wheat harvest. Several cotton growers had to replant some acreage due to recent unfavorable weather conditions. Winter wheat harvest was expected to begin soon. Hay producers were reporting good yields on their first cutting. In Middle Tennessee, corn farmers were finishing the planting of corn. The prior week's rains boosted row crop conditions. In East Tennessee, the recent rains also proved beneficial to row crops. Livestock producers continued to report reduced hay yields due to unfavorable conditions in the spring. There were 5.0 days suitable for field work. Topsoil moisture was 1 percent very short, 12 percent short, 77 percent adequate, and 10 percent surplus. Subsoil moisture was 1 percent very short, 11 percent short, 79 percent adequate, and 9 percent surplus.
