Tennessee Winter Wheat Production Forecast up 11% from 2021

According to the Tennessee Field Office of the USDA's National Agricultural Statistics Service **Tennessee** farmers expect to produce 25.9 million bushels of **winter wheat** from 365,000 acres for harvest this season. At this level, production would be up 11% from 2021 and up 8% from the June forecast. Based upon crop conditions as of July 1, growers expect a yield of 71.0 bushels per acre, unchanged from 2021 and down 2.0 bushels from last month's forecast.

Winter wheat production for the **Nation** was forecast at 1.20 billion bushels, up 2% from the June 1 forecast and down 6% from 2021. Based on July 1 conditions, the United States yield is forecast at 48.0 bushels per acre, down 0.2 bushel from last month and down 2.2 bushels from last year. The expected area to be harvested for grain or seed totals 25.0 million acres, down 2% from last year.
