1/ Utilized production - The sum of fresh market and processed do not equal utilized production for 1929-1958 because home use is not included in the breakdown.

2/ Prices - Season average price estimates were started in 1919 and represented an "as sold" price. The basis for prices changed in 1959 to an equivalent PHD price (packing house or processing plant door).

3/ Fresh market and processed quantity and price estimates started in 1929. Processed utilization discontinued in 1959 to avoid disclosure of individual operations.

4/ Canned price - Quantity for 1952-1958 includes minor quantities of other utilization. Prices for 1952-1958 represent canned price.
